Computing and Finance @ NTU | Equities Investing, Options Trading & Systems Dev

EDUCATION

Nanyang Technological University Bachelor of Applied Computing in Finance	Jul 2026 – Present
Director, Investment Interactive Club (IIC) Investment Academy	
Analyst-in-Training, Investment Banking Club (IBC) Asset Management	
Hwa Chong Institution <i>Integrated Program, 4H2 in Math, Physics, Computing and Economics</i>	Jan 2018 – Nov 2023
Media Director IntersTECH '23, Admin Director Hwa Chong Studio Symposium '22	
Event Coordinator FPSO World Congress '22, Co-Leader Project Silver Lining 2.0 '21	

RELEVANT EXPERIENCE

Self-Directed Fundamental Equity Portfolio Lead Analyst & Investor	Apr 2024 – Present
- Formulated and executed catalyst-driven investment theses across US small/micro-cap equities, generating a +580% Time-Weighted Return (TWR) and Alpha vs. S&P 500 across a 6-figure AUM portfolio - Conducted bottom-up valuation specializing in small-caps and biotech, evaluating clinical trial success probabilities, risk-adjusted NPV (rNPV) models, and balance sheet cash runways - Structured active options strategies (LEAPS, long straddles) to capture implied volatility expansion around binary clinical trials, earnings readouts, and asset acquisitions - Managed portfolio risk via a multi-broker Core-Satellite framework, allocating passive capital into sector ETFs while capping active downside through bracket orders	
Singapore Police Force K-9 Unit Narcotics Detection Dog Handler & Field Training Officer	Jan 2024 – Jul 2026
- Ministry of Home Affairs contracted regular officer - Executed checkpoint patrols, passenger/luggage searches, responded to islandwide tactical activations, maintaining canine operational readiness and training new NSFs and dog handlers - Architected and deployed a full-stack Vue.js & Firebase web application with secure authentication to automate real-time digital case logging, tracking, and retrieval for the unit	
BTimes Consulting PTE. LTD. Technology & Operations Intern	Nov 2021 – Feb 2022
- Researched and presented data-driven pitch decks and client advisory materials to support strategic decision-making - Technical procurement and specification design for a cross-border Visa prepaid payment solution (WAN Card) targeting Greater China inbound tourism to Singapore	

AWARDS & PROJECTS

Singapore Police Force K-9 Unit Team of the Year & Special Outstanding Officer Commendation	2026
Singapore Police Force Special Operations Command Commander's Award	2025
GovTech LAUNCH! Product Hackathon <WTHack> 1 st Runner Up	2025
Youth Policy Making Conference Debate Champion	2022
Future Problem-Solving Program International National Finalist	2021
Embedded Hardware Systems Assembly: Designed custom hardware interface for ESP-32 S2 microcontroller boards and wrote Arduino firmware for low-latency telemetry and sensor data display on TFT screen	2026
Distributed CV & Embedded Control System: Built a multi-threaded zero-copy UDP pipeline offloading real-time YOLOv8/TensorRT vision inference (<10ms latency, 60+ FPS) to drive an ESP32 microcontroller	2026

SKILLS & INTERESTS

Financial & Valuation: Fundamental Analysis, Financial/rNPV Modeling, Options & Volatility Strategies
Programming: Python, JavaScript, Vue.js, Firebase, PyTorch, TensorRT, OpenCV, Network Sockets
Hardware & Systems: ESP32 Microcontrollers, Arduino Firmware, System Diagnostics, Serial Protocols, EV Powertrain & BMS
Languages & Focus: Native English & Mandarin Chinese; US Micro-Cap Equities, Biotech/Clinical Trials
