

# Wang Huiwen

Technology geek with 7+ years of experience in coding and computer systems  
Avid micro-cap, biotech investor and options trader

## EDUCATION

**Nanyang Technological University** *Bachelor of Applied Computing in Finance* August 2026-Current

**Hwa Chong Institution** *Integrated Program* January 2018-December 2023

## RELEVANT EXPERIENCE

**Self-Directed Fundamental Equity Portfolio** *Lead Analyst & Investor* April 2024-Current

- Formulated and executed fundamental, catalyst-driven investment theses across US small/micro-cap equities, achieving a +580% Time-Weighted Return, generating significant Alpha vs. the S&P 500 with a 6-digit portfolio under management
- Conducted bottom-up fundamental valuation specializing in small-caps and biotech, evaluating clinical trial probability of success and rNPV models, balance sheet cash runways, and upcoming corporate catalyst timelines
- Structuring active options strategies including LEAPS for long-term thematic exposure and long straddles to capture implied volatility spikes around binary clinical trials, earnings readouts and asset acquisitions
- Managed risk via a multi-broker Core-Satellite framework: allocating passive core capital into broad sector ETFs to preserve base liquidity while capping active risk through bracket orders

**Singapore Police Force K-9 Unit** *Narcotics Detection Dog Handler & Field Training Officer* January 2024-July 2026

- Ministry of Home Affairs contracted regular officer
- Executed high-security checkpoint patrols, passenger/luggage searches, responding to emergency tactical activations across the island, maintaining canine operational readiness and officer in charge of training NSFs and new dog handlers
- Architected a full-stack Vue.js & Firebase web app with secure authentication to automate real-time digital logging, tracking, and retrieval of case evidence across mobile and desktop interfaces for the unit

**BTimes Consulting PTE. LTD.** *Technology & Operations Intern* November 2021-February 2022

- Researched and presented data-driven pitch decks and client advisory materials to support strategic decision-making
- Technical procurement and specification design for a cross-border prepaid payment solution (WAN Card) targeting Greater China inbound tourism to Singapore

## AWARDS & PROJECTS

**Team of the Year Award w/ Special Outstanding Officer Commendation, Singapore Police Force K-9 Unit** 2026
